NATURE TRAILS

BIG TREE – 3/4 MILE

A short woodland trail with a large variety of hardwood trees identified for your convenience. An ancient post-glacial sand bar is crisscrossed halfway around.

SKY-COME-DOWN – 1 MILE

Some woods, some fields and some in-between "edge" areas typify this trail. A three-acre pond enhances its diversity and attractiveness to a variety of wildlife.

LONG BARK – 2 MILES

After sampling the sights and sounds of the Huron River, this trail plunges into deep woods where the quiet competition among plants dominates.

SPLIT LOG – 700 FEET

A hard surface, all weather trail ideal for people with special accessibility needs, seniors and people with baby strollers.

WALK-IN-WATER – 1 MILE

This is a backwater trail for canoeists. Launch your canoe off the service drive. Pick up a map to interpretive stops before you leave.
